STACS '95

12^{th} Symposium on Theoretical Aspects of Computer Science
March 2–4, 1995, MÜNCHEN, GERMANY

The 12^{th} Symposium on Theoretical Aspects of Computer Science is organized jointly by the Special Interest Group for Theoretical Computer Science of GESELLSCHAFT FÜR INFORMATIK (GI) and the Special Interest Group for Fundamental Computer Science of AFCET.

Scope: Authors are invited to submit papers presenting original and unpublished research on theoretical aspects of Computer Science. Typical areas include (but are not limited to):

> *Abstract data types, algorithms and data structures, automata and formal languages, computational complexity, computational geometry, computational issues in AI, computer systems theory, cryptography, learning theory, logic in computer science, parallel algorithms, program specification, semantics of programming languages, theory of data bases, theory of parallel and distributed computation, VLSI structures.*

Submissions: Authors are invited to submit **SIX** copies of a draft of a full paper (in English, 5–12 pages, the title page must contain a classification of the topics covered, preferably using the list of topics above) and **FIFTEEN** copies of a one page abstract to the chairman of the program committee. If available, e-mail addresses and fax numbers of the authors should also be included. Electronic submission is not possible.
